

## 5" Louvre Grill

CODE G906

### Description

The Manthorpe louvre vent is designed for use on the interior of a building to provide ventilation to an internal space. The louvre design minimises the amount of uncomfortable draught, reduces light and sound transfer from outside the property whilst providing a free area (measured) of 100cm<sup>2</sup>. It should be fitted in conjunction with Manthorpes' 125mm diameter pipe duct and other products in the range to provide an unobstructed channel through the wall structure.

### Specification

Colours	White
Packing Details	per box
Weight	0.111 kg
Material	Polypropylene
Manufacturing process	Injection moulded
