

Product Codes:

Fixing Clip

GLV-FC

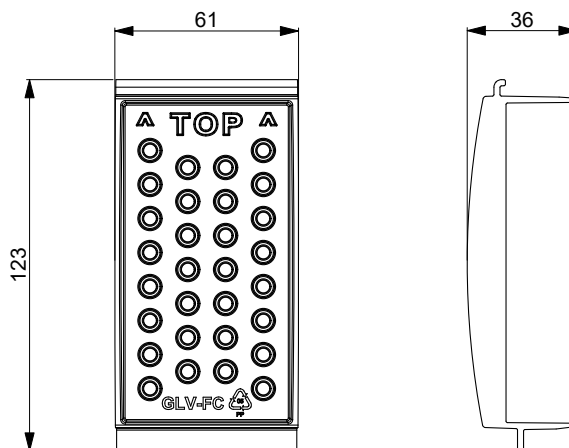

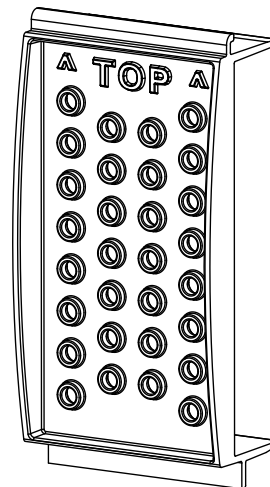

Description:

The Manthorpe SmartVerge® Linear Dry Verge Fixing Clip can be used to provide additional fixing points along the verge when fixing the **GLV-LH** or **GLV-RH** Linear Verge Units.

The **GLV-FC** Fixing Clip can be fastened to an additional batten strip fixed to the underside of the verge. The first Linear Verge Unit is then clipped securely over the Fixing Clip providing a strong fix to the eaves.

For roofs where the bottom course tiles are tilted upwards, two Fixing Clips can be used to secure a cut section of Linear Verge Unit to the verge, a third Fixing Clip should then be used to start the continuous run.

The design can be used on both the left and right hand verges and is completely concealed after installation of the system.

Packing Details 10 per box

Weight 305g per box
23g per part

Material Polypropylene

Manufacturing Process Injection Moulded

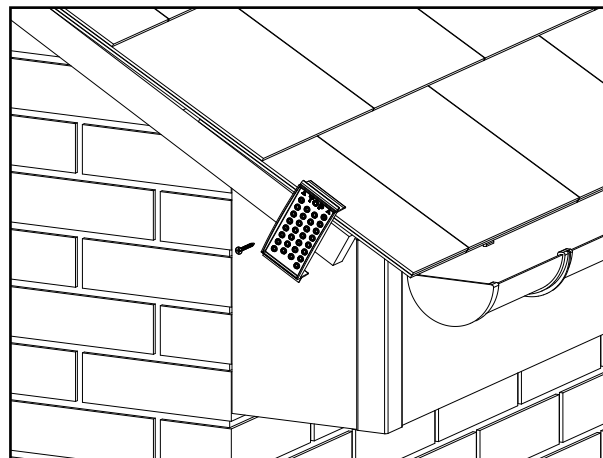

Colour Black
(Not visible when installed)
